

ENDURING COMMUNITY VALUE FROM MINING

This project will analyse the benefits flowing from mining and the ways these benefits can translate into enduring value to the communities in which mining activities take place, during and beyond the mine's life. It will also generate strategies that remote communities can use to deal with sudden shocks and global changes.

THE COOPERATIVE RESEARCH CENTRE FOR REMOTE ECONOMIC PARTICIPATION IS A RESEARCH CENTRE DELIVERING SOLUTIONS TO ECONOMIC DISADVANTAGE IN REMOTE AUSTRALIA.

ENDURING COMMUNITY VALUE FROM MINING IS PART OF THE CRC-REP'S REGIONAL ECONOMIES RESEARCH PROGRAM.

PROJECT IMPACTS

- Improved beyond-life-of-mine planning processes that encapsulate the development aspirations of local communities and create locally based structures and organisations that function after mine site decommissioning.
- Stronger regional communities by ensuring that more benefits of mining remain within the local economy and contribute to the improvement of local people's lives.
- Strategies that remote communities can use to deal with sudden shocks and global changes.
